Phoenix DryMAX XL - XL LGR Dehumidifier

CUT SHEET

The groundbreaking DryMAX XL removes an amazing 125 ppd at AHAM while taking up only 50% of the space of the next smallest competitive XL dehumidifier. Because of its compact size, the DryMAX XL allows restorers to fit twice the amount of XL dehumidifiers on their vehicle. The DryMAX XL is also the first dehumidifier with built-in Bluetooth technology. Our free DryLINK app is included with the unit upon purchase. This unit will automatically send the psychrometric data by Bluetooth to the DryLINK app or an app you may already use for your drying jobs.

Like our industry-leading DryMAX and AirMAX, the new Phoenix DryMAX XL was also designed with superior stacking features and easy service access. Our patented FiveCOIL Design, which includes our micro-channel condenser, allows the featherweight DryMAX XL to pack a knock-out punch on drying performance every time.

DryMAX XL OUTSTANDING FEATURES
