BIGGER SELECTION. BOLDER STYLES.

2014 sees the largest range of lines and products yet - all in one catalog. But what else have you come to expect from the originals in high-viz?

HIGH VISIBILITY WORKWEAR • Our most comprehensive line of high-viz, all of which are in-stock and ready to ship.

FLAME RESISTANT APPAREL • More FR products have been added to this year's catalog. Check our website for the full line.

PUBLIC SAFETY VESTS • Vests that serve the brave men & women who serve us, including Incident Command vests.

PROFESSIONAL SURVEYORS SERIES • Featuring our two flagship surveyor's vests, with utility to spare. See the rest online.

Products with this header belong to the industry leading **BRILLIANT SERIES** family of ultimate visibility apparel.

The **BLACK SERIES** products are our style-forward line of premium high-viz for the discerning worker.

USA MADE NOW YOU HAVE THE FREEDOM OF CHOICE

We are now including select styles of our USA MADE garments in our Master Catalog. Since these products are manufactured in our Santa Ana, California facility we can ensure the highest level of quality. Then we take it one step further by customizing the product exactly as you'd like, such as adding the popular tablet (iPad) pocket. Ask your sales rep or call our helpful customer service for more details. These products are made-to-order, so please allow 2 to 4 weeks lead time.

THE BRILLIANT SERIES ADVANTAGE

If safety, and therefore maximum visibility is your top priority then our Brilliant Series is the solution. These garments have been designed to have the most conspicuous reflective footprint possible. The reflective trim and accents radiate quick human movement which dramatically enhances low light visibility. See for yourself at mlkishigo.com/brilliant.html.

Watch the BRILLIANT SERIES in action! Just scan with a QR reader on your smart phone or visit our video page at: mlkishigo.com/brilliant-videos.html

Class 3 T-shirts	23 - 24		

BRILLIANT VS STANDARD

TOMORROW IS YOUR REWARD FOR WORKING SAFELY TODAY.

BLACK SERIES

YOU NEED TO BE SEEN, BUT NOW YOU'LL BE NOTICED

FR FLAME RESISTANT

ML Kishigo has become an ever growing authority on FR. Our High-Viz FR vests are all tested in accordance with one or more of the methods listed in the ANSI standard. Learn more on page 49.

The Black Series features ML Kishigo's original active-wear style as well as:

- Increased Durability
- Added Functionality
- Enhanced Visibility
- Extra Breathability

Never before have style and functionality blended so seamlessly. Our Black Series is for the uncompromising worker who demands a garment that's more visible, more durable, and hands down better looking than anybody else's on the job site. We've always said, when you're this visible you'd might as well look your best!

FR SWATCH BURN

Not all FR materials are created equal. Some companies may claim their garments are FR, when they are merely polyester that's been chemically treated to self extinguish. Check out our swatch burn test to see exactly what happens to our various materials, so you'll know what to expect.

ARC FLASH TESTING

Our FR materials must pass an arc flash test to prove the flame resistance before we can label them accordingly. Scan to watch demonstrations of tests we've had performed in the past, or visit our FR video page to see the difference between FR and non-FR in a side by side comparison.

To watch the Burn Test and Arc Flash Demo, scan with a QR reader on your smart phone or visit: mlkishigo.com/products-fr.html

Small only available in orange
ANSI/ISEA 107 Class 2 Compliant

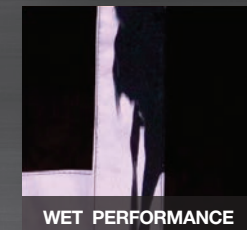

There are two different types of retro-reflective materials that are currently available and meet the present ANSI/ISEA 107 High Visibility Standard:

PRISMATIC VS GLASS BEAD

Prismatic retro-reflective material (PRM) is unique in that it utilizes thousands of micro-prisms that are protected by a transparent film. It performs exceptionally well under wet conditions and avoids abrasion because of this protective layer. In addition, PRM materials are far more efficient at returning light to drivers' headlights than glass bead products. Prismatic materials are also available in fluorescent colors for added visibility during dusk, dawn, and inclement weather conditions when additional conspicuity is most important. Day or night. Wet or Dry.

WET PERFORMANCE

WET PERFORMANCE

The silver glass bead material is flexible, light weight and uses microscopic glass beads adhered to a fabric backing. It's a good solution for many kinds of work environments, however there are two issues: exposure to abrasion and its ability to perform well when wet. In fact, under wet conditions glass bead tape can lose a substantial amount of its reflectivity right before your eyes – and more importantly, right before the drivers' eyes. Water causes the reflective optics to scatter the light, rather than reflect it back to an approaching motorist.

ULTRA-COOL™ MESH BACK SOLID FRONT VEST

1208A LIME 1207A ORANGE

ANSI/ISEA 107 Class 3 Compliant

BLACK SERIES LONG SLEEVE T-SHIRTS

9134 LIME 9135 ORANGE

PERFORMANCE FEATURES:

- Microfiber polyester material wicks away moisture
- 2" wide reflective breathable tape significantly reduces "hot spots" and provides greater flexibility over solid tapes
- Black sides provide contrast and add a sporty look

POCKETS:

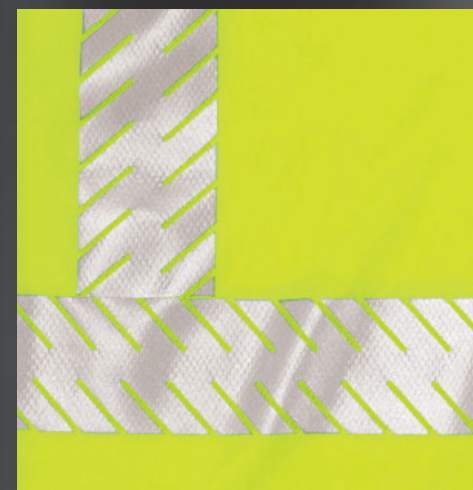

- Left chest pocket

SIZES: M-5X

ANSI/ISEA 107 Class 3 Compliant

BREATHABLE REFLECTIVE TAPE UP CLOSE

ML Kishigo's Breathable Reflective Material is designed using a segmented pattern to enhance comfort, flexibility and breathability versus standard solid reflective material. The benefits of the segmented or "breathable" reflective material are even further enhanced when used on a t-shirt. When worn "next to skin", solid reflective materials create "hot spots" by trapping in heat causing perspiration. The segmented reflective material allows air to flow with less restriction and therefore greater comfort. Lightweight, due to the reduction of mass in the laser cut design, as well as flexibility are performance enhancements over standard solid tapes. Our breathable reflective materials meet all Level 2 performance requirements (the highest level for a reflective material) of ANSI/ISEA 107.

MICROFIBER LONG SLEEVE T-SHIRT

9122 LIME 9123 ORANGE

PERFORMANCE FEATURES:

- Microfiber polyester material wicks away moisture
- Perfect for protecting your arms from the sun while staying cool

THE HICS SYSTEM

Serious emergency situations occur when least expected, requiring personnel to perform with the utmost efficiency and professionalism. The HICS (Hospital Incident Command System) is an industry-recognized organizational chart that clearly defines a chain of command to assist hospitals in managing their staff in the event of a disaster.

- ANSI/ISEA 107 Class 3 Compliant

**ANSI 107-2010 FR STANDARDS:
MADE EASY**

ANSI states: "High-visibility garments marked as flame resistant shall comply with the requirements of one of the following methods in its entirety". Simply put, to include "FR" or "Fire Resistant" on the ANSI neck label the garment must pass one of the seven methods below:

1. **NFPA 1971** - Standard on Protective Ensembles for Structural Fire Fighting and Proximity Fire Fighting
2. **NFPA 1977** - Standard on Protective Clothing and Equipment for Wildland Fire Fighting
3. **NFPA 2112** - Standard on Flame-Resistant Garments for Protection of Industrial Personnel Against Flash Fire
4. **ASTM F1506-08** - Standard Performance Specification for Flame Resistant Textile Material for Wearing Apparel for Use by Electrical Workers Exposed to Momentary Electric Arc and Related Thermal Hazards
5. **ASTM F1891-06** - Standard Specification for Arc and Flame Resistant Rainwear
6. **ASTM F2302-08** - Standard Performance Specification for Labeling Protective Clothing as Heat and Flame Resistant
7. **ASTM F2733-09** - Standard Specification for Flame Resistant Rainwear for Protection Against Flame Hazards

FR Labeling Requirements: If the garment complies to one or more the ASTM methods, the garment must display "FR" and the specific methods used on the ANSI neck label
