WHY USE NATURAL LAMBSKIN PRODUCTS?

- Finest Professional Painting Results
- Naturally Expands to Hold More Paint
- Natural Oils Prevent Matting for Uniform Coverage
- Can be Cleaned for Multiple Uses
- 400,000-600,000 Wool Fibers Per Square Inch

Applicator & More

Professional Roller Covers

CARE OF NATURAL LAMBSKIN PRODUCTS

- **Always Pre-Wet a Natural Lambskin Paint Tool**
Pre wet the tool with water. This opens up the space between the fibers allowing the paint to penetrate into the pile, helping the tool load and release more easily.
- **Never Overload a Natural Lambskin Product**
Overloading reduces penetration of the paint causing the cover to slide instead of roll and can result in matting.
- **Never Soak a Lambskin Cover**
Never leave a cover soaking in paint or solvent. This will reduce the usable life of the cover.
- **Remove Cover Immediately After Use**
With **water based** paint, wash immediately with soap and warm water. Rinse until clean, then spin dry to allow air to penetrate into the pile. Never "Squeegee" a cover dry. With **oil based** paint, dip the cover into the thinner recommended by the paint manufacturer (turpentine, mineral spirits, etc.). Roll out excess thinner and spin dry. Never "Squeegee" a cover dry.
