GOOD *   BETTER **   BEST ***

Decon 30 utilizes our same Benefect proprietary Thyme Oil Active Ingredient which revolutionized the antimicrobial industry, but features a unique, optimized dynamic chemistry (ODC) surfactant system that boosts cleaning performance while still achieving hospital level disinfection - all with 75% LESS Thyme Oil! The result is a very light, fast-dissipating fragrance. The system also improves penetration into porous surfaces like carpet or wood and enhances mold killing and mildew prevention!

Armed with both products, the professional contractor can now safely and effectively tackle more jobs with the comfort and confidence that comes from using Benefect products!
